Human Computer Interaction Labs 4th Year **2026/2027**

Lab 4 (I) Semester: S7

From Users to Interfaces - part I: From Personas to Prototypes

Designing effective interfaces begins with a deep understanding of users. *Personas* help capture users' most important characteristics. In this lab, we will connect user characteristics to design practice by creating personas and scenarios.

Objectives:

- Define and explain the purpose of *personas*.
- Create realistic personas and scenarios for a case study.
- **Work in groups of 3 max to generate more reliable results and more accurate findings related to *UI* and *UX*.**

Lab Work

1. **Activity 1: Personas & Scenarios [45 mins+ 15 Disc]**

The work in this activity must be done in groups of 3 or 4 students.

A. We have the Car Showroom case, as presented in *appendix (A)*.

B. Create the following 3 personas: *The Road Trip Enthusiast; The Weekend Racer and F1 enthusiast (Ferrari Tifosi*  *); The Student on a Budget; introduce a negative persona for this app.* **You may as well create alternative personas; use your creativity and inspiration**.

C. For each persona, define: *demographic info, goals, pain points, expected interaction* (See *appendix (B)*).

D. Write one short scenario per persona (See *appendix (B)*).

E. Based on the personas and scenarios, brainstorm **conceptual design directions**. Think of major design headlines, such as:

- Key features that would be essential for each persona.
- Possible navigation or interaction priorities (e.g., quick access to comparisons, immersive visuals, budget-friendly filters).
- Any potential conflicts between user needs.

At this stage, you are not designing interfaces yet, just outlining the **big ideas** that should guide your future design choices.

Use *appendix (B)* for inspiration, or you can use the following *AI Persona Generators*: AI User Persona , User Persona

2. **Activity 2: Sharing Insights & Reflection [30 mins Disc]**

This activity is an open discussion between the groups.

A. Present your personas, scenarios, and **major design headlines** to the class. Explain your choices (e.g., inspiration sources, use of AI tools, personal observations).

B. **Class reflection:**

- How do personas and scenarios shape the direction of a design before any interface is built?
- Were there any conflicts between personas that challenged your design headlines?
- What did you learn about the importance of understanding users at this early stage?
- **What do you think about the use of AI to create personas (Synthetic Users vs. Real Voices)**?
