Human Computer Interaction Labs 4th Year **2025/2026**

Lab 4 Appendix (A) Semester: S7

From Users to Interface Appendix (A): Case Study: Car Showroom

This appendix provides all the necessary information about the **Car Showroom** case. It includes the main features of the website and the mobile app. You will use this information to guide your design process from low/medium-fidelity sketches toward high-fidelity prototypes. **You are invited to use your imagination and creativity to go beyond these requirements.**

Website Prototype: Key Features

- **Homepage**
  - Carousel of featured cars and promotions
  - Quick links to inventory, promotions, financing options, and contact details
  - Testimonials from customers
- **Search and Filter List**
  - Search by make, model, price range, fuel type, and car type,...
  - Filters to sort results (e.g., newest vs. oldest vehicles, ...)
  - Clear images and brief descriptions in results
- **Car Description Page**
  - High-quality images and videos (May include: *360°, AR, VR, etc.*)
  - Key specifications (engine type, horsepower, fuel economy, safety features...)
  - Options for comparison with other vehicles (*if supported by key specifications: horsepower, fuel economy, safety features,...*)

  - Contact information for sales representatives

- **User Account and Wishlists**
  - Account creation for saving favorite cars
  - Tracking of financing applications

- **Blog Section**
  - Articles on maintenance, services, financing tips, industry, racing news,...

Mobile App Prototype: Key Features

- **Login/Registration**
  - Login via social media or email
  - Personalized dashboard with saved cars and recommendations

- **Quick Vehicle Browsing**
  - Simplified search with filters similar to the website
  - Swipeable cards for quick browsing

- **Additional Features**
  - Localization (e.g., nearest dealers or promotions)
  - In-app messaging with sales representatives (*to schedule visits or request info*)
  - Notifications for promotions, new arrivals, or price changes

Note for Students

When prototyping, consider:

- Consistency between the website and mobile app (branding, features, visual identity)
- How personas might interact differently with each platform
- What to prioritize when adapting from desktop (web) to mobile (small screen, gestures, limited attention span)
- **Feel free to get creative and add new features or design ideas to the website or mobile app prototypes. Think outside the box, but always keep your personas in mind, every addition should connect back to their needs, expectations, and challenges. The more your design reflects the life of your persona, the stronger and more meaningful your prototype will be.**
