Lab 4 Appendix (B) Semester: S7

From Users to Interface Appendix (B): Guidance for Creating Personas and Scenarios

When designing your own personas and scenarios (User Journey), you are free to invent realistic characters that reflect the diversity of potential users. Below are some suggested *persona titles* to inspire you. Each persona should include background information, goals, pain points, and a short user journey or scenario.

- **Persona 1 : James, The Luxury Enthusiast**
  - **Age**: 40
  - **Occupation:** Corporate Executive
  - **Tech Skill Level:** High
  - **Goals:**
  1- Browse and purchase luxury vehicles with the latest technology.
  2- Quickly compare high-end models and see the latest promotions.
  3- Access exclusive dealership offers and services.
  - **Pain Points:**
  1- Needs to compare multiple luxury cars side-by-side.
  2- Wants the purchasing process to be quick and consistent.
  3- Interested in cutting-edge technology but finds the details overwhelming.
  - **User Journey:**
  James likes the *mobile app* to browse the luxury section. He filters by specific high-end cars and compares specifications like horsepower, interior features, and tech. The video feature helps him visualize the cars, as well, James even prefers to use any other high tech to enrich this experience 360°, VR, AR... (e.g., James Explores a Luxury Car in VR. Where, He uses immersive features to compare the interior and exterior before contacting the showroom). He arranges an in-person visit to the showroom, making use of the VIP services advertised.

- **Persona 2: Maria, The Family-Oriented Buyer**
  - **Age**: 34
  - **Occupation:** Stay-at-Home Parent
  - **Tech Skill Level:** Moderate
  - **Goals:**
  1- Find a spacious, safe, and fuel-efficient family car.
  2- Learn about safety features, seating, and storage capacity.
  3- Explore options for eco-friendly cars.
  - **Pain Points:**
  1- Confused by too many technical details.
  2- Needs help to decide between eco-friendly and family-focused options.
  3- Time-constrained and can't spend too much time on the research.
  - **User Journey:**
  Maria starts by visiting the *website* to read the blog about family car recommendations. She uses the search filter for example high safety ratings and large storage. She reads customer reviews and saves a few models to her account for future reference. Next, she switches to *the app*, which offers a smooth experience by syncing her saved car models from the website, checking for any promotions, and finally, scheduling a visit to the dealership.

Note: These are only examples. You are encouraged to invent your own personas that reflect diverse needs and behaviors *(As asked in Lab 4 Part I)*. Always connect your persona's goals and frustrations to the features and design choices in your prototypes.
